Interactive comment on “Damages during February, 6–24 2017 Çanakkale earthquake swarm” by Ramazan Livaoğlu et al.

Anonymous Referee #2

Received and published: 1 August 2017

I read the paper and the first Referee Comment done by S. Kundak, I agree completely with this comment because it describes most of the observations I wanted to write. In addition, I want to underline that the English level of the text is very poor and there are a lot of errors, so a very important revision in that sense is necessary for a further publication. Another observation is about the figures, that are often too little to be clear.
