Received and published: 8 April 2018

Author(s) have to taken into account the following comments:

- Title: the second letter should initiate with a lower case letter; "climatology" instead of "Climatology".

- Keywords are missed, they should be included at the end of the abstract.

- Threshold value of $dT_r$ (temperature differences between T850hPa and SST which is equal to 13 degrees Celsius) should be compared with other references. Comparisons have to be discussed at this part of the paper.
- The list of acronyms should be added at the first page of the paper.
- At Figs. 2, 3, 4, 5, 6 and 7; North direction and scale should be added.
- Cyclonic EPS bars should be in the same colour (blue) in two regions at Fig. 8.
