Review of Manuscript submitted to NHESS

Dear Authors, first thank you for a very well-written manuscript about the role of climate change in the forest fires in Sweden 2018. I found the manuscript very interesting; it summarizes quite well the implications of your results and your conclusions are well-defended by the analysis you present. This paper is entirely suitable for publication in NHESS, I have only a few minor suggestions and corrections.

Line 35. I would suggest to include a reference (e.g. Drobyshev et. al. 2012) after “Though forest fires are common in Sweden”

Line 107. Please change “it provides” to “they provide”

Line 108. Please change “dataset” to “datasets”

Line 199. Please can you better explain why JRA-55 performs differently?
